

Your Total **Healthcare**
and **Emergency** Management
Solutions Partner

Products & Services you can **TRUST!**

Operating in **complex** and **remote** environments, providing clients with total **Healthcare and Emergency Management** Solutions, tailor-made to suit your environment and budget.

Offering a cost-effective and integrated approach to Healthcare and Emergency Management. Our services include **medical staffing**, medical and rescue **equipment supply**, accredited medical, rescue and health & safety **training**. Additional services include aeromedical evacuation, clinic development, occupational health, ISO 45001 (H&S) implementation and healthcare risk management consultancy.

On-site **Medical Staffing**

We understand that human capital is a valuable resource therefore safeguarding employee health and well-being is of vital importance, more so when working in complex or high risk environments. We offer on-site medical staffing including doctors, nurses and paramedic personnel specifically qualified to mitigate on-site risk. Our staffing solutions are custom designed, focusing on both prevention and response, with our personnel operating as functioning members of your team, assisting with compliance, duty of care and business continuity.

Medical, Rescue, Health & Safety **Training**

As one of the leading providers of Medical, Rescue, H&S training in Africa, we provide accredited courses including; Medical (BLS, ACLS, ITLS and PALS), Emergency Rescue (rope rescue, confined space, HAZMAT and vehicle extrication) and a H&S Officer training program (risk assessment, incident investigation, induction, management systems, first aid, firefighting and evacuation planning). Offering clients on-site training anywhere in Africa, ensuring compliance and competency across the medical, rescue and H&S teams.

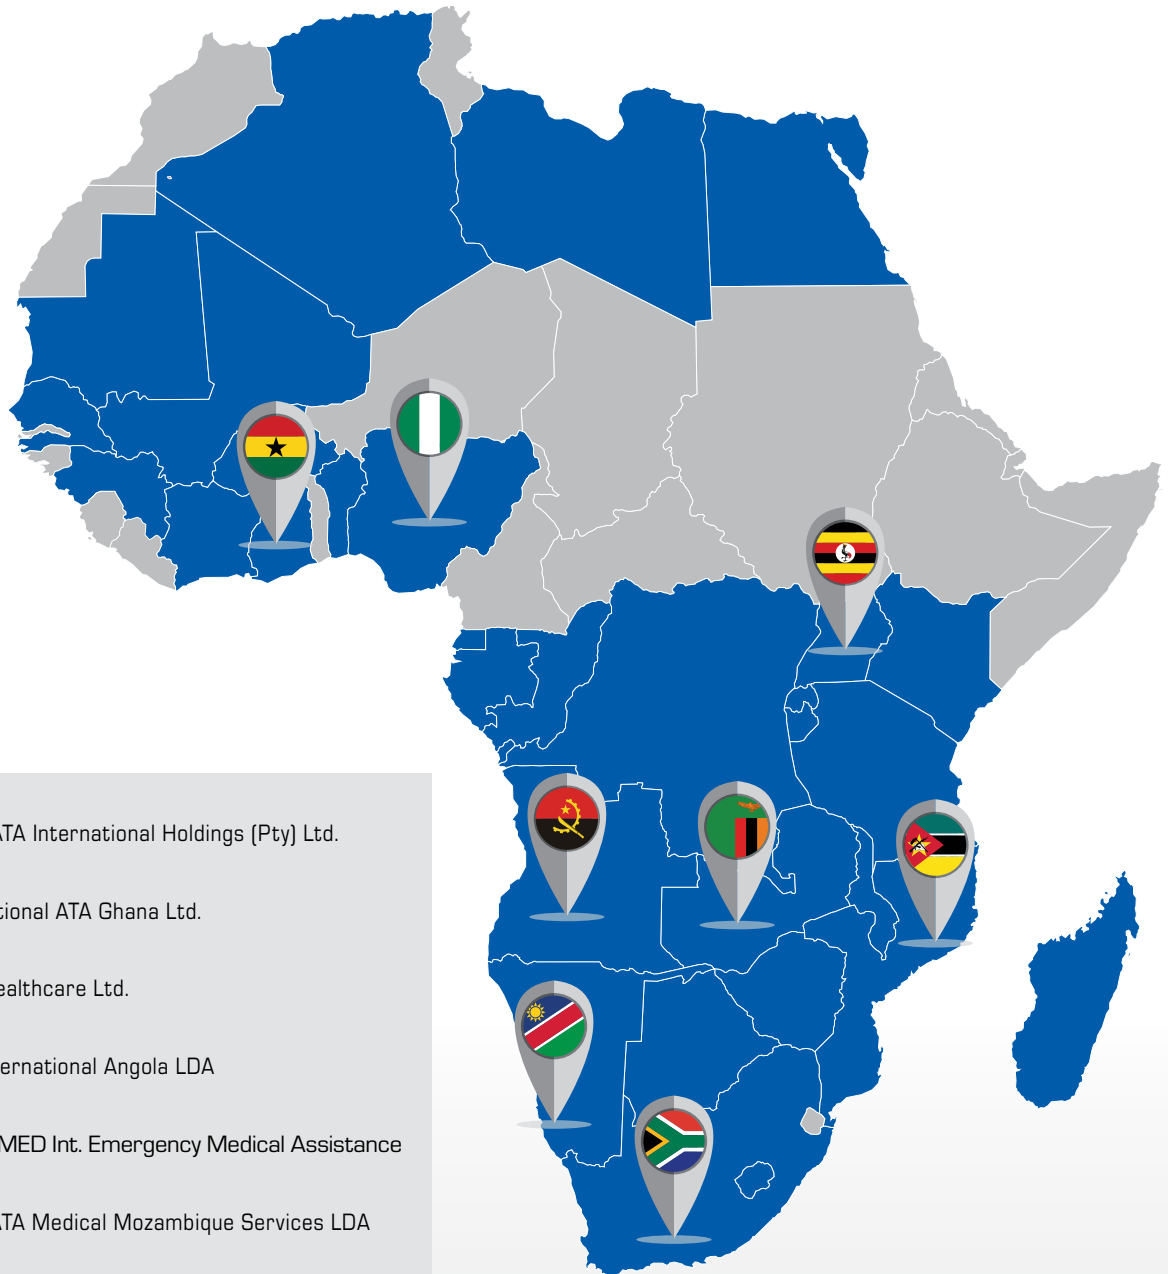

Medical & Rescue **Equipment**

As part of our integrated approach to healthcare, our on-site personnel evaluate existing capital and consumable equipment and where necessary, commission industry standard equipment to your site through our procurement department. We procure equipment and consumables for hospitals, occupational health and remote site clinics, emergency and rescue response teams. Our team manage the logistical and administrative process of exporting equipment into Africa and endeavor to purchase the highest quality products at the most affordable prices.

On-site Medical Staffing

[READ MORE >](#)

Medical Staffing

Protecting the health and well-being of your workforce can be challenging, especially in remote regions with limited access to healthcare facilities. When the nearest suitable medical facilities are far away, it is imperative that you have the right medical staff, equipment and facilities on-site to keep your employees healthy and safe.

Our medical experts are available for on-site evaluations, providing professional advice and developing solutions to suite your healthcare and emergency requirements. Services include organising, staffing and operating medical and occupational health clinics, delivering specialised ambulances, rescue vehicles and equipment, as well as supplying the necessary consumable equipment.

Occupational Health Services

Establishing site specific occupational health and medical surveillance programs is part of our total healthcare management solutions. Our occupational health programs are committed to establishing workplaces that are without risk to the health and well-being of site employees. Occupational health services can include:

- + Site staff entry, periodical and exit examinations;
- + Advising management on healthcare legal requirements
- + General health surveillance and environmental monitoring
- + Overseeing immunisation programmes
- + Conducting health promotion campaigns
- + Liaison with outside agencies such as enforcement agencies

24/7/365 On-site Medical Solutions

Operating in oil and gas, mining, exploration and construction sites across Africa. Our solutions range from a single ALS paramedic, to complete medical and emergency response teams available 24/7/365 days of the year.

On-site medical and ER teams are supported by topside assistance with access to additional medical advice and telemedicine technology. In the instance of a serious medical emergency, we are able to provide Aeromedical Evacuation services into Africa.

Medical, Rescue, Health & Safety Training

Medical & Rescue Equipment Consumables

[READ MORE >](#)

Medical & Rescue Equipment

Supplying a broad range of medical and rescue capital and consumable equipment. We are able to source unique, customisable and specific equipment for occupational health surveillance, full clinic establishment, or smaller remote site Clinic-in-a-Box setups. Annual equipment calibration services can also be supplied to ensure optimal performance as required by the manufactures.

Clinic-in-a-Box

Quality care, rapid set-up at your location! The turnkey modular designed Clinic-in-a-Box solution is the ideal solution, for remote and established project sites in Africa. The Clinic-in-a-Box solution caters for a range of medical services including primary healthcare, occupational healthcare, emergency rooms and laboratory services. Various configurations are available and are based on the sites scope of work, location, mobility needs, population size and the available budget. The clinic is supplied together with all the required capital and consumables medical equipment, necessary for the clinic to function optimally.

Ambulances and Rescue Vehicles

We facilitate the conversion and fitment of ambulances, emergency response and rescue vehicles, fully equipped to your specifications. Customized emergency vehicles can be equipped for a range of medical and rescue functions, in addition to suiting local mobility requirements.
